

Hanna Tutaj – Poland

Institute of Environmental Sciences, Faculty of Biology, Jagiellonian University, Kraków, Poland.

Hanna Tutaj earned her PhD in biological sciences from Jagiellonian University in 2023. She is a member of the Evolutionary Genetics Team within the Institute of Environmental Sciences at Jagiellonian University's Faculty of Biology. Her research focuses on understanding the underlying causes and broad implications of genomic instability in the budding yeast *Saccharomyces cerevisiae*.
