

Mark Hochstrasser – USA

Department of Molecular Biophysics & Biochemistry, Yale University, New Haven, USA

Dr. Hochstrasser is currently the Eugene Higgins Professor of Molecular Biophysics & Biochemistry at Yale University (US). He has been on the Yale faculty since 2000 and was previously a member of the faculty at the University of Chicago between 1990 and 2000. Dr. Hochstrasser received his bachelor's degree from Rutgers University and a Ph.D. in biochemistry from the University of California, San Francisco. He did postdoctoral research at MIT (Cambridge, US) where he began his studies on the ubiquitin-proteasome system.
